

Anand Prem

Senior Backend Software Engineer

📍 Kerala, India 📞 +919400929404

🚀 Profile

Backend developer by profession and iOS developer by passion. I got chances to take full responsibility for multiple areas of a Japan-based e-commerce platform which have millions of users worldwide. I got the chance to architect, develop and support two major platforms consists of Coupons section and Wishlist section for Canada and Europe regions. I am always curious enough to learn new technologies. Love to learn new things in coding. Always love to take risks and try to update my work with latest tech stacks.

👛 Employment History

Senior Software Applications Developer at QBurst Technologies
July 2015 – Present 📍 Cochin

🎓 Education

Bachelor of Technology in Computer Science and Engineering,
Federal Institute of Science And Technology
June 2011 – May 2015 📍 Cochin

🎯 Projects

Coupons Platform

This Node.js app consists of coupons needed for a Japan-based retail holding company(I couldn't mention the details of the company in resume due to NDA) for their store and e-commerce sites. This handles creation, assigning and consumption of coupons for Canada and Europe regions.

Wishlist Platform

This Node.js app handles the wishlist section of users from Canada and Japan regions for the Japan-based retail holder(I couldn't mention the details of the company in resume due to NDA). This platform handles adding, removing and analytics of wishlist for the users.

Catalogue Platform

This Node.js application handles the catalogue's backend for a Japan-based retail holder(I couldn't mention the details of the company in resume due to NDA). This app performs the periodic downloads of GB sized data from various other platforms and manipulates the data for the catalogue format. Memory-efficiency and synchronization were the key part for this app.
